## About the Society:

The K.L.E. Society was established by selfless and dedicated services of seven teachers revered as the 'Saptarshis'. They had the vision and foresight for the upliftment of the downtrodden and the illiterate. Their efforts were further nourished and nurtured by the founder members. The sacred sacrifices, selfless efforts and perennial zeal of these committed visionaries and many others resulted in the genesis of the K.L.E Society in the year 1916. The emblem of the Society lay's special emphasis on the principles of Truth, Love, Service and Sacrifice. Now, the K.L.E Society has **250 plus** Institutions under its fold. It is running educational institutions right from Kinder Garden to Post-Graduation in Arts, Commerce, Science, Management, Agriculture, Technical and Medical fields. K.L.E Society has achieved horizontal and vertical growth under the dynamic Chairmanship of Dr. Prabhakar Kore who has put the K.L.E.Society on the global map. With changing global scenario K.L.E.Society has well-equipped itself to meet any challenges in the field of education.

## About the College:

The renowned KLE'S Arts and Commerce College located at Gadag-Betageri was established in 1985 with the efforts of the Akkana Balaga (Local Ladies Association) and the blessings of the pontiff Jagadguru Tontadarya Math Gadag. When started, it was Women's Arts College, the only college meant for women in Gadag District. Due to several reasons the management decided to introduce co-education College and accordingly got the permission of Karnataka State Government approval and affiliation of Karanatak University Dharwad in the year 2011. The college boasts of having unique building with state of art facilities both in academic and non-academic spheres. The college was re-accredited with "B<sup>++</sup>" Grade by NAAC in 2016.

## About the Seminar:

The ecological balance brings the existence of the world. Earth's inhabitants such as human beings, plants, animals and other micro living organisms continue to survive. These species get the conducive environment to multiply and thrive. The world gets to produce sufficient food for all species. Hunger caused by drought becomes history. This is because the drought will never be experienced at any point. Also, green environment is maintained. This means that the world achieves its equilibrium state that benefits and protects all living organisms in it.

Environmental education is concerned with those aspects of human behaviour which are more directly related to man's interaction with bio-physical environment and his ability to understand this interaction.

One of the most glaring problems which the world faces today is the environmental pollution. Man has exploited nature excessively at the cost of the environment. There is an immediate need to make people aware about environmental degradation. Education and public participation may change and improve the quality of environment.

In this context we have organised this seminar with the following objectives:

- To reduce the quantity of polluting substances discharged into the environment.
- To promote the use of environmentally acceptable materials.
- To reduce, reuse and recycle wherever possible.
- To instill environmental awareness among the stakeholders.

## Sub Themes:

- Climate Change: Adaptation & Mitigation
- Youths and Ecological Balance.
- Best practices of the HEIs in Ecological Balance.
- Ecological Imbalance and its Impact on economy.

### One Day Seminar on "Ecological Balance: Need of the Hour"

One Day National Seminar on Ecological Balance: Need of the Hour" was organized by IQAC and the Department of Social Sciences on 6<sup>th</sup> Oct., 2018. The main objective of the seminar was to bring awareness among the public about environmental degradation and improvise the quality of environment through public participation.

Dr.S.K.Gali, Former Dean, Department of Environmental Science, University of Agricultural Science, Dharwad was the Chief Guest for the Inaugural Function. In his inaugural address, he stressed upon the steps to be taken to control ecological imbalance. He opined that it is the responsibility of one and all to protect our nature as nature protects us. If one fails, it would have adverse effect on social, political, economic status of the country. The ecological imbalance is due to air,water and sound pollution. Men are unaware of the consequences of pollution and ignore to control it. This is mainly due to modernization of life style. He also opined that industrialization has contributed to a larger extent in ecological imbalance.

Dr. Debasis Patnaik, Professor, Department of Economics, BITS Pillani. Goa, was the Keynote Speaker. In his address, he expressed his view that Ecological Imbalance not only have impact on economics but also on Ecological Safety of the state, Health of the nation, Life of future generations, Organization and development of ecological entrepreneurship.

In his address, he stressed upon the Environmental indicators to measure development which are Number of clean air days, Minimum level of waste, Nature based environment designs, %age of population using potable water, %age of population using sewers, %age of population using car pooling or public Transport, %age of prime agricultural land, Tons of hazardous waste generated annually, Tons of solid waste generated annually, Tons of toxic release annually, Number of institutions dealing with environmental issues, Number of environmental education classes in public and private academic institutions, Legal environmental structure, Awareness among people about collective benefits of clean environment, People's sensitivity about pollutions of various types, Nature of waste management systems, Budgetary allocations for environmental projects, Volume of use of chemicals and chemical fertilizers, Level of health hazards, etc.

He focused upon the need for Economic Management, where the managers can recognize the need for transition to a new model of economic management as per market requirements and consumer demand. HE expressed his unhappiness that the methods for evaluation of ecological activity of enterprises are absent.

Ecological destruction like destruction of soils, lack of land cultivation, pollution, production ecologization etc, processes prevent progress of ecological entrepreneurship. He called upon the youth to take up Ecological Entrepreneurship which activities cleaner
