One Day State Level Workshop on Structured Query Language for B Com V Sem Students

Smt Shilpa Kongi

Structured Query Language (SQL) is a database language designed for managing data held in a relational database management system. SQL was initially developed by IBM in the early 1970s (Date 1986). The initial version, called *SEQUEL* (Structured English Query Language), was designed to manipulate and retrieve data stored in IBM's quasi-relational database management system, System R. With this regards our college organized One Day State Level Workshop on Structured Query Language for B Com students on 14-09-2018. Smt Shilpa Kongi of K L E Society's M C, Dharwad was the resource person. Madam stressed the benefits of SQL.

She also expressed that in the late 1970s, Relational Software Inc., which is now Oracle Corporation, introduced the first commercially available implementation of SQL, Oracle V2 for VAX computers. The advantages of learning SQL are expanding and significant. SQL had a colossal increment in utilization during the most recent couple of years. Now, this tendency proceeds because companies gather more and more information that has to be stored and comprehended afterward. The benefits are Universal Language, Open-Source – Easy to learn and use, Manage Million Rows of Data, Technology Evolution and High in Demand.

Smt Gowra Yalamalli introduced the resource person. Principal presided over the workshop. Miss Likhita V proposed Vote of thanks. Totally 35 students benefited by the Workshop.
