Common Mistakes to avoid when investing in an IPO

- ✓ Individuals must first take a holistic perspective of their financial objectives before investing in accordance with their risk appetite.
- ✓ Investors must also read the offer document before betting on an IPO. The key things to look in an offer document are: Risk factors, financials of the issuer, outstanding litigations and defaults, if any, business overview, the background of promoters and instructions before making an application.
- ✓ Individuals should also go through the post-issue advertisements for issue price and basis of allotment.
